

Solidago nemoralis

Old-Field Goldenrod

Also called gray or dwarf goldenrod. One of the smaller goldenrods, with silvery-grey foliage, and flowers in narrow, arched sprays at the tops of unbranched stems. Very long-blooming. Goldenrods do not cause hayfever! They bloom at the same time as ragweed, a major offender.

Suggested companions: arrow-leaved aster (*Aster sagittifolius*), wild bergamot (*Monarda fistulosa*), little bluestem (*Schizachyrium scoparius*), butterfly weed (*Asclepias tuberosa*)

Plant Type: Wildflower

Size: 2-3' H
W

Water Tolerant: No

Habitat:

Open field/ Prairie
Woodland Margin

Soil: Average Garden Soil
Sandy/ Gravelly

Exposure: sun

Flower Color:
Yellow

Plant in:

Groundcover: No

Bloom Time:
August
September
October

Other Attributes:

Bird attracting
Butterfly attracting
Deer resistant
Fall color
